

# Plex 153

FUND

A structural shift in global finance.  
A *deliberate* opportunity to be positioned  
for it.

We are not here to pitch a trend. We are here to present a thesis — backed by institutional signals, regulatory momentum, and an investment framework built around the infrastructure layer of the next era of global finance.

MULTIPLY • DIGNIFY • EXCEL

# A focused team. A disciplined thesis. A clear window.

Plex 153 Fund LLC was built by a team with direct operational experience at the intersection of technology, community finance, and digital asset infrastructure. We are not generalists. We focus on a single thesis: that ISO 20022-aligned digital assets are the infrastructure layer of the next global financial system — and that the current window between institutional adoption and market valuation represents a compelling entry point for patient, informed capital.

## OUR OPERATING PRINCIPLE

We believe capital deployed with **discipline, timing, and purpose** does not have to choose between strong financial returns and meaningful community impact. This fund is built to deliver both — transparently, and on verifiable terms.

# The global financial system is rewiring — right now

Every generation or so, a structural shift in global finance creates a narrow window. The move from the gold standard. The rise of the internet. The emergence of mobile payments. These moments don't announce themselves loudly. They are recognized in retrospect by those who were not positioned — and quietly, by those who were.

We believe we are in one of those windows right now. Global financial infrastructure is transitioning to a new messaging and settlement standard — ISO 20022 — and blockchain-based digital assets built on that standard are becoming the connective tissue of the next era of world commerce.

## THE SYSTEM WE KNEW · 1971–PRESENT

### The Petrodollar Era

- Oil priced exclusively in USD
- Dollar dominance through trade dependency
- SWIFT messaging — legacy infrastructure
- Settlement cycles of T+2 or longer
- Access concentrated in major financial centers

TRANSITION  
UNDERWAY

## THE SYSTEM BEING BUILT · NOW

### On-Chain Dollar Infrastructure

- Tokenized real-world assets and stablecoins
- USD positioned at the center of digital rails
- ISO 20022 — the new global standard
- Near-instant, programmable settlement
- Access extended to the underserved

*We are past the speculation phase. We are inside the adoption phase. The gap between where infrastructure stands today and where valuations stand is precisely where patient, informed capital has historically produced its strongest returns.*

#### CONFIRMED SIGNAL

2025

### Federal Reserve joins ISO 20022

On July 14, 2025, Fedwire — the Federal Reserve's high-value payment system processing trillions of dollars daily — officially adopted the ISO 20022 standard. This is the clearest institutional signal yet.

#### LEGISLATIVE SIGNAL

2025

### The CLARITY Act passes the House

The Digital Asset Market CLARITY Act passed 294–votes with broad bipartisan support. For the first time, a clear regulatory framework for digital assets is within reach — removing the single greatest institutional barrier to capital entry.

#### MARKET INFRASTRUCTURE

2025

### DTCC settlement modernization

The Depository Trust Company is actively modernizing its settlement infrastructure to accommodate digital assets. When the pipes of US capital markets update, what flows through them changes with it.

#### INTERNATIONAL SIGNAL

Ongoing

### BIS Project Agora

The Bank for International Settlements — the central bank of central banks — is actively developing tokenized deposit infrastructure alongside seven major central banks. This is not an experiment. It is a roadmap.

#### FOR THOSE WHO OPEN THE DOOR

## A success reward for introducing qualified investors

We believe the best opportunities travel through relationships of trust. If you know an accredited investor for whom this opportunity might resonate — and you make the introduction — we recognize that value.

#### SUCCESS REWARD

We offer a success reward of **3% to 5% of the capital invested** to whoever introduces us to an accredited investor who completes their participation in the fund. The exact percentage is determined based on the size of the investment and the nature of the relationship, and is confirmed in writing before any formal introduction.

This reward is earned once the referred investor's capital has been formally committed and accepted by the fund. If you have someone in mind who would value this conversation, reach out to us for the success reward agreement details.

# A clear structure, a transparent return

We manage a curated portfolio of ISO 20022-aligned digital assets on behalf of our investors. We do not speculate. We do not chase. We position in assets that carry institutional-grade underpinning, hold with discipline, and distribute returns tied to publicly verifiable milestones.

01

**You invest**  
  
Your capital is allocated into a curated portfolio of ISO 20022-compliant digital assets — the infrastructure layer of next-generation global payment rails.

02

**The market grows**  
  
As the total global cryptocurrency market cap crosses defined milestones, each threshold unlocks a progressively higher participation return. You don't need the whole market to explode — just grow.

03

**You get paid — and so does someone else**  
  
Returns are distributed to you, and the fund's proceeds flow into the communities and businesses we exist to serve. Your return is not extracted from someone else's loss. It creates something new.

Your return is tied to a single, publicly verifiable number: total global cryptocurrency market capitalization. Four milestones. Four possible return levels. No hidden calculations, no opaque fees, no surprises.

\$3.5 Trillion

**7.8%**

TIER 1

\$4.0 Trillion

**11.2%**

TIER 2

\$4.5 Trillion

**18.0%**

TIER 3 · YOUR  
DECISION

\$5.5 Trillion

**22.0%**

TIER 4 · MAXIMUM

### TIER 3 — YOUR DECISION, IN WRITING

At the \$4.5 trillion milestone, you hold the pen: lock in your 22.0% return, or elect to remain invested for Tier 4 and the 22.0% maximum. No action is ever taken without your written instruction. Withdrawals are not available before Tier 3 — your capital is committed for the journey, not parked for the weekend.

### INVESTOR PROTECTIONS

## Institutional-grade custody. Three-principal governance. Full transparency.

#### ● **Qualified custodian**

Investor assets are held in institutional, insured digital custody through a federally regulated qualified custodian. You are never relying on us to hold your funds — a licensed institution does.

#### ● **Three-principal unanimous governance**

Capital deployment requires the agreement of all three principals. No single person can move your investment unilaterally. Every decision is a consensus decision — by structure, not by trust alone.

#### ● **Regulation D 506(b) framework**

This offering is structured under Regulation D, Rule 506(b), available to accredited investors. You receive a formal operating agreement and amendment before any capital is committed.

#### ● **Quarterly reporting**

You receive a formal quarterly report — portfolio performance, milestone progress, market update, and impact deployment summary. You will always know where things stand.

THE NEXT STEP

# If the thesis holds up under scrutiny, we welcome the conversation

This is not a broadcast. If you are reading this, it is because someone in your network thought your investment criteria and this opportunity might be well-matched. We welcome hard questions. The next step is simply a conversation where we answer them.
